

REEF FRIENDLY AQUARIUMS

Need help choosing aquarium pets?

Choosing the right animals is key to being a successful aquarium owner. Research before you buy and consider:

Size – How big will it get?

Diet – What does the animal eat? Is the food readily available? Will it eat its tankmates?

Compatibility – Is the animal territorial? Does it need to live in a group? Will it get along with others in the tank?

Price – How much does the animal cost? How much do you want to spend on the aquarium overall?

Habitat – What habitat does this animal need? Is there enough shelter for everyone in the tank?

Hide and Seek – Will this fish be visible or will it hide? Is this fish nocturnal?

Difficulty – How challenging is this fish to keep?
